

Message from the Heavens for All World Leaders-

Delivered September 30 2007 by Bryan Farnum Oracle of Truth Sept 30 2007

“All world leaders (and people of this world,) individually have self accountability and self responsibility with this genocide...”

“The 9 Points World Leaders need to do for Darfur”

Point 1: The world community needs to acknowledge that there has and is a genocide going on in Darfur

Point 2: Collectively the western world needs to send more money to Darfur, in an organized manner to support the needs of the people in the refugee camps

Point 3: The western world needs to collectively call (and to take the legal proceedings) for Sudanese General (President) Omar Al-Bashir to resign

Point 4: International Laws need to be set up involving the UN and other countries, where collectively the countries come together under an agreement that the international community is allowed to enter another Nation (regardless of not receiving the approval of the leader of that Nation), to come in and rescue those who are facing genocide

Point 5: The country of Darfur needs to be separated into 3 separate regions, each region being given an independent government; the international community has to help these governments get set up

Point 6: There are many sick and wounded in Darfur that need to be airlifted to safe zones (transportation equipment, money, medical provided by intl. community)

Point 7: Communication—radio, internet, TV needs to be reestablished/setup in Darfur; freedom of speech needs to be given back to the people (and Divine Truth needs to be given to world leaders, which is partly the responsibility of the Pope)

Point 8: To defer the exodus of the people of Darfur to neighbouring countries by bringing peace to the region through a UN Mandate (UN troops at all borders, highways, routes to protect the people) Full disclosure of what is going on in Darfur should be given to the world (Divestment from companies involved with the genocide in Darfur)

Point 9: Each taking self accountability and self responsibility now, so in future, many other countries can avoid genocide; this depends on the people of influence making the difference now
